## Course outline

This course will enable delegates to:

- Consider how exploring real objects and nature provide wonderful opportunities for cross curricular learning when starting with Understanding the World
- How can you use loose parts, rocks, sticks, mud etc to benefit child development.
- Learn what is problem solving and how do we encourage creative thinking?
- Discuss how expeditions locally can enhance children's understand of the world.
- Explore a variety of materials and objects and reflect on how children might develop and learn with them, and provide rich opportunities for problem solving.

## The trainer

You can view Kathryn's profile on her [dedicated Associates page](#).

Speaker: Kathryn Solly

Time: 9am Registration, Course runs 09.30 - 15.30
